

## **Digital Asset Custody Solutions Pty Ltd**

Over the last decade, digital assets have provided the world with an entirely new, non-correlated, asset class into which they can invest and store their wealth.

*...bitcoin is a non-sovereign, hard cap supply, global, immutable, decentralised, digital, store value. ....What that leads us to is, it is a hedge against monetary and fiscal irresponsibility from central banks and governments globally.” - Travis King*

### **Who is DACS?**

Digital Asset Custody Solutions Pty Ltd (DACS) delivers cryptocurrency and digital asset-related services to the market. DACS operates in a developing market of cryptocurrencies, stablecoins and digital asset-based financial services including the new public and private blockchain platforms. These platforms are the basis for a range of new financial services that will emerge from established and upcoming banks, custodians, and fund managers seeking legitimate and commercial ways to operate in this new environment.

### **Our Services**

#### **‘White Glove’ - Over The Counter Service**

DACS offers a bespoke, ‘velvet glove’ service for clients who seek to acquire or divest themselves of bitcoin or other select digital assets (eg: stable coins)

The service is unique in that it offers access to BTC and unique liquidity based on risk and client unique needs. We work with HNW’s, SMSF’s, Corporate treasuries and businesses who operate an AFSL.

## Custody Solutions

DACS will supply and help our customers secure and set up a hardware wallet or high-security solution specific to their circumstances whether individual or corporate.

### 1. Custody Service Overview

- a. Cryptocurrency and Digital asset use case analysis, needs definition and risk mitigation strategy.

## Digital Asset Accounting, Audit & Estate Solutions

We provide a range of accounting-based services that allow for reporting and transparency regarding all holdings. We form estate action plans in case of death or other events (commercial or personal) requiring access by a third party. We also offer bespoke solutions for corporations and fund management companies.

## KryptoConnect.io

[KryptoConnect.io](https://kryptoconnect.io) is an education publication and includes our Podcast '*Crypto with Christo*' (Peter Christo our founder). Our objective is to empower our clients so that they understand digital assets as an investment class within the context of their own financial requirements.

Moreover, we want our clients to be equipped and be involved in line with their own financial needs.

It is important to note that we are not financial advisors, and are not in any way providing investment advice. Our services are for corporations and sophisticated investors managing their own wealth. However, we would be happy to work with your advisor or fund manager.

## Clients and Segments we serve

Sophisticated Investors

Commercial Entities

Fund Managers

Superannuation Funds

Private Funds

Banking & Finance
